

R&D Tax Associate / Senior Associate

We are recruiting for a R&D Tax Associate / Senior Associate to join the Entrepreneurial Tax Team. This client facing role allows you to help companies claim valuable tax relief when eligible to help them innovate, scale and build their business. This is a fast moving, exciting, role with fantastic opportunities for challenging work with phenomenal clients.

Our Entrepreneurial Tax Team are a multi award-winning team, with a broad range of clients and a focus on delivering the best client service. The team are usually based in our Edinburgh office, however we offer our team the opportunity to base themselves where they work best, whether that is at home or in our offices.

What you will do:

Your key responsibilities will include:

- Meet with clients to get a true understanding of what they do, and help identify eligible projects that meet the BIS Guidelines
- Write technical reports, detailing the technological advancement, baseline and uncertainties faced, in a format suitable for HMRC
- Undertake full financial analysis to identify eligible R&D expenditure
- Advise clients pro-actively on changes to legislation and potential impacts to their claim so they can confidently make key business decisions
- Whilst you will predominately be R&D Tax focused, you will be part of the Entrepreneurial Tax team and involved in other specialist areas such as Enterprise Investment Scheme (EIS) advice as well as the preparation of share valuations for share schemes to name a few - no two days are the same!

What we are looking for:

We are looking for someone who is keen to learn, personable and who is motivated to achieve technical excellence for our clients. Your skills should include:

- Forward looking attitude with an ability to use initiative and to solve problems
- Strong/advanced skills in Microsoft Excel
- An inquisitive interest in the latest Technology
- Numeracy
- Ability to learn and adapt quickly, as well as plan and deliver work to tight deadlines
- Excellent communication skills
- Interest in career development/progression
- Ability to understand explain technical issues
- Degree qualified or about to qualify, minimum 2:1 classification
- Willing to study towards tax accountancy qualifications

What you will receive:

- Supported study – working towards ATT and CTA tax accountancy qualifications
- Opportunity to progress - due to the success of the team, there are no barriers to rapid career progression
- An integral role in a dynamic team
- Opportunities to develop a vast range of skills through varied work
- Strong technical understanding of taxes

- On the job training and support

How to apply:

If this sounds a good fit for you, submit your CV and covering letter using the link above. You should include in the covering letter why you are applying for this role along with your salary expectations and where applicable, your notice period. Please note that like many organisations, we have adapted our working practices to ensure the safety of our team and our clients. Our teams are all currently working remotely, and this is likely to continue for the foreseeable future.
